

ETERNA

concealed frame

The ETERNA concealed frame for GENERA washing toilets is synonymous with high quality and reliability, as well as a guarantee of many years of trouble-free use of the appliances. The frame is equipped with a number of features that make both its assembly and use a lot easier. The pneumatic system and the economical flush mode (2/4 l or 3/5 l) have been employed out of concern for the environment. The FreshZone function (the possibility of placing the toilet cube in a basket under the flush button) combined with the ClearZone rimless technology ensures the highest level of hygiene.

DEKORA

pneumatic buttons

DEKORA pneumatic flush buttons are dedicated products for GENERA washing toilets. Thanks to the technology used, they guarantee the stable and repeatable operation of the entire system and ensure the highest level of user satisfaction. Suitable for two flush volumes, with larger or small amounts of water, flush actuation is quiet and smooth, no great force is required to press the buttons. Installation is intuitive and very quick. Designed with the utmost care, they subtly but clearly suggest which key activates the flush with more water; that key protrudes slightly above the surface of the button plate and is finished with a decorative chamfer. The button plate is covered with a sheet of glass, white or black, and the buttons, round or square, are made of brushed stainless steel. DEKORA flush buttons are elegant, but also very functional finish to the bathroom, which will delight all connoisseurs of modern trends in room arrangement.
